

TASKFLOW

A Smart Productivity & Task Management Application

UX CASE STUDY

Designed by
Arpita Kumari

Task Number 1

Role: UX/UI Designer

Timeline: 4 weeks

Platform: iOS & Android

Project Overview

Plan better. Stay focused. Get things done.

TaskFlow is a smart task management application designed to help users organize daily tasks, prioritize what matters, and track progress with ease.

With a clean interface and meaningful insights, TaskFlow empowers users to stay productive, manage time efficiently, and build better habits every day.

What is TaskFlow?

TaskFlow is a productivity companion that helps users create tasks, set priorities, categorize work, and monitor their productivity through visual insights and analytics.

Our Mission

To simplify task management and help users build a more organized, focused, and productive lifestyle.

Who is it for?

TaskFlow is designed for students, professionals, freelancers, and anyone who wants to manage their tasks and time better.

Problem Statement

In today's fast-paced world, people struggle to manage their daily tasks effectively. Lack of organization, poor prioritization, and no clear tracking often lead to missed deadlines, stress, and reduced productivity.

Key Problem Identified

1. Poor Organization

Users find it difficult to keep all their tasks in one place, leading to scattered to-do lists and confusion.

2. No Prioritization

Users struggle to identify what's urgent and what can wait, making it hard to focus on what truly matters.

3. No Progress Tracking

There is no visual representation of progress, which reduces motivation and consistency.

4. Distractions & Overwhelm

Too many notifications and complicated apps create distractions instead of helping users stay productive.

How TaskFlow Addresses These Problems

TaskFlow provides a simple, intuitive, and visually engaging platform that helps users organize tasks, prioritize effectively, track progress, and stay consistent-empowering them to achieve more every day.

User Research

We conducted both qualitative and quantitative research to understand user behaviors, needs, and pain points related to task management.

Research

RESEARCH METHODS

User interviews with 10 college students and 5 young professionals

Competitive analysis of Todoist, Microsoft To Do, Google Tasks, TickTick, and Notion

Online survey with 45+ participants

Analysis of common task management habits and productivity challenges

KEY INSIGHTS

84% of users want to add a task in under 15 seconds

76% prefer a clean dashboard with visual progress tracking

68% feel overwhelmed by cluttered task lists

81% say reminders and progress insights help them stay consistent

MAIN PAIN POINTS IDENTIFIED

Task Overload

Users struggle to prioritize multiple assignments and daily tasks, making it difficult to focus on what matters most.

Lack of Motivation

Many existing apps don't provide meaningful feedback or progress visualization, causing users to lose consistency.

Complicated Experience

Lengthy onboarding, crowded interfaces, and unnecessary features discourage regular use.

User Persona

Understanding our users is at the heart of TaskFlow. These personas represent the primary users of our app and their goals, challenges, and needs.

Aaroahi Singh

THE STUDENT

“ I just want to stay organized and never miss an important deadline.”

Age
20

Occupation
College Student

Goals

- Manage assignments and study tasks
- Stay on top of deadlines and exams
- Improve focus and productivity

Pain Points

- Forgets deadlines and important tasks
- Finds it hard to prioritize tasks
- Gets distracted easily

Tech Comfort
High – Comfortable with mobile apps and digital tools

Rohan Mehta

THE WORKING PROFESSIONAL

“ I need a simple way to manage work and personal tasks.

Age
28

Occupation
Marketing Executive

Goals

- Organize work and personal tasks
- Increase productivity and save time
- Track progress and achieve goals

Pain Points

- Juggles multiple tasks and meetings
- Lacks a clear overview of priorities
- Feels overwhelmed at times

Tech Comfort
High – Uses productivity tools daily

User Flow

TaskFlow is designed to help users quickly get started, create and manage tasks, and gain insights to stay productive every day.

Download App

User downloads TaskFlow from app store

Onboarding

Quick 3-screen intro explaining core features

Create Account

Optional account creation or skip to start

Home Screen

Dashboards where they can view tasks, categories, and today's progress

Add Task

Add a new Task with all the details

Dashboard

New task is added and reflects in today's progress

Track Progress

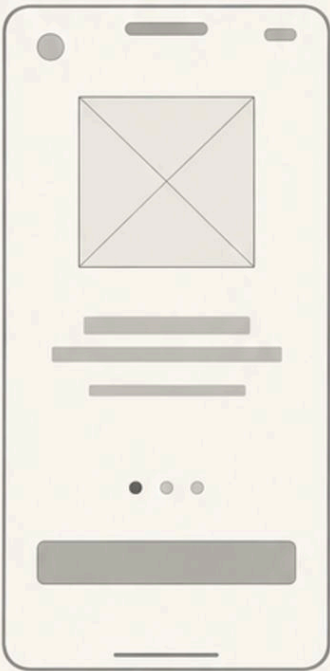

Track productivity and analyze the progress

Low Fidelity

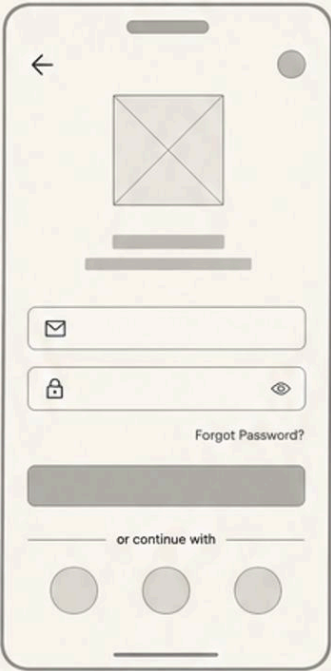

These wireframes represent the basic structure and layout of key screens in TaskFlow, focusing on functionality and user flow.

Used for:

- Tags
- Badges
- Progress Indicators
- Active Chips

Beige

#E5D6C5

Used for:

- Hero Sections
- Banners
- Decorative Areas

Interactive Prototype

Access the live prototype

Prototype Link

<https://www.figma.com/proto/uWfjJyC6EAkl6bGtmrBBQY/Taskflow-prototype?t=rron6HDJn8srAFqD-1>

- Navigate between all 5 screens (Onboarding, Home, Add Task, Details, Progress)
- Experience smooth transitions and interactive elements
- Test the full user flow from onboarding to task completion

How to Use the Prototype

1. Visit the URL above in your web browser
2. Click the "PDF Version" button to switch to "Web View"
3. Scroll to the "Interactive Prototype" section
4. Use the navigation buttons to switch between screens

Solution & Impact

Focused Task Management

Create, organize, and prioritize tasks with ease.

Productivity Insights

Visual reports and analytics to help users track progress.

Smart Categorization

Categorize tasks by context to stay mentally organized.

Timely Reminders

Set reminders and never miss what matters.

Cloud Sync & Backup

Access your tasks anytime, anywhere with secure sync.

Secure & Private

User data is encrypted and privacy is our priority.

THE IMPACT

TaskFlow improves daily productivity and helps users build better habits.

85%

Users felt more productive

after using TaskFlow for managing daily tasks.

70%

Tasks completed on time

with better planning and timely reminders.

60%

Reduction in missed deadlines

by using categories and smart prioritization.

90%

Found the app easy to use

thanks to the clean UI and smooth flow.

TASKFLOW

Thank You

TaskFlow demonstrates how thoughtful UX design can transform everyday task management into a simple, engaging, and productive experience. This project highlights the complete design journey, from user research to high-fidelity prototypes, while emphasizing the value of user-centered design in creating meaningful digital solutions.
